

TABLE OF CONTENTS

CHAPTER 1		
CRIME SCENE INTERVENTION	1	
Introduction	1	
Individuals Responsible for Processing a Crime Scene	1	
Patrol Officer	1	
Investigator	2	
Crime Scene Specialist	2	
Basic Objectives	2	
Recovering Evidence that Demonstrates the Implication of a Person in the Crime	2	
Corroborating the Statement of a Witness, Complainant or Victim	2	
Judicial Proceedings	3	
Different Types of Interventions	3	
Examining a Crime Scene Examination Based on Information Obtained from a Complainant or Victim	3	
Examining a Crime Scene Examination in a Situation where a Victim is not Available to Provide Information	4	
Carrying Out a Search Warrant	4	
Processing a Crime Scene	4	
Essential Considerations	4	
Protection of Life	4	
Protection of Evidence	5	
Clothing and Equipment	5	
Comprehensive Equipment List	5	
Two Key Principles	6	
Be Objective	6	
Analyze and Filter Your Findings	6	
Points of Interest	7	
Stages in a Crime Scene Examination	9	
Set Up an Exterior Command Post	9	
Establish a Path of Contamination	9	
Measures to Prevent Contamination	10	
Required Equipment	10	
Preliminary Investigations	10	
Types of Preliminary Investigations	10	
Preliminary Exterior Investigation	11	
Preliminary Interior Investigation	12	
Path of Contamination	12	
Interior Workstation	12	
Planning Your Work	13	
Order of Priority for Collecting Evidence	13	
Thorough Exterior Investigation	14	
Environment	14	
Producing a Proportional Sketch	15	
Photographs	15	
Moving Around the Scene	16	
Processing the Ground	16	
Processing the Immediate Surroundings	16	
Thorough Interior Investigation	16	
Workstation	17	
Description of the Premises	17	
Taking Photographs	17	
Producing a Proportional Sketch	18	
Searching Room by Room	18	
Conducting a Ground Examination	18	
Searching for other Evidence in the Room	18	
Conducting a Thorough Search	18	
Pursuing Further Examination	18	
Before Leaving the Scene	19	
Compare the Work You Did with the Work You Planned	19	
Read Your Personal Notes	19	
Do a Recap of the Scene	19	
Share Your Findings with the Investigator in Charge	19	
Tidy the Scene	20	
Walk Through the Scene with the Victim or Someone Who Knows the Place	20	
Take Time to Think	20	
Release the Scene	20	
Preliminary Investigations	21	
Thorough Exterior Examination	22	
Thorough Interior Examination	23	
Preparing for a Search	25	

Search Patterns	25	Scanning Surface	45
General Rules	25	Advantages	46
Photography	25	Disadvantages	46
Sketches	26	Latent Fingerprints	46
Searching a Home	26	Definition	46
Concentric Method	26	Composition	46
Searching a Large Area	27	Permanence	47
Zone Pattern	27	Individuality	47
Grid Pattern	28	Identification Characteristics	48
Preparing Your Report	30	Delta	49
Why Write a Report?	30	The Substrate	50
Report Requirements	30	Non-Porous Surfaces	50
Crime Scene Observations	31	Porous Surfaces	50
Conclusion	31	Semi-Porous Surfaces	51
 		Developing and Lifting a Print	
CHAPTER 2		with Fingerprint Powders	51
FORENSIC IDENTIFICATION	33	Preparation	52
Introduction	33	Required Equipment	52
History of Criminal Identification	33	Using the Brush	53
Taking Fingerprints with Ink	35	Developing the Fingermarks	53
Preparing to Take Rolled Ink Impressions		Identifying Fingermarks	
(Ten Prints)	35	on the Substrate	54
Safety Rules for Officers	35	Lifting	54
Working with the Suspect	35	Using Chemical Agents	
Fingerprint Cards	36	to Develop Fingermarks	59
Fingerprinting	36	Non-Porous Surfaces	59
Ink the Plate	36	Cyanoacrylate (Glue Vapor)	59
Inking an Individual's Fingers	38	Treatment	59
Finger-by-Finger Prints	38	Handling of Evidence	60
Instructions	38	Applications	60
Four Fingers Taken Together	38	Colour Rendering	60
How to Assess the Quality of Your Card	39	Rhodamine 6G	60
Improperly Rolled Fingerprint	39	Basic Yellow (BY-40)	61
How to Correct a Poor Impression	39	Amido Black	63
Consequences of Submitting		Treatment	63
a Poor Quality Card	40	Handling of Evidence	63
Taking Palm Prints	41	Applications	63
Safety Rules for Officers	41	Cleaning	63
Working with the Suspect	41	Porous Surfaces	63
Required Material	41	IND or IND-Zn (1,2-Indanedione	
Fingerprinting	41	or 1,2-Indanedione/Zinc Chloride)	64
Taking Digital Fingerprints	44	Treatment	64
Quality Criteria	44	Handling of Evidence	64
How to Use a Scanner	45	Applications	64
		DFO (1,8-Diazafluoren-9-One)	65

Treatment	65	Points to Be Considered	82
Handling of Evidence	65	Transportation of the Victim	82
Applications	65	Displaced Objects	82
Ninhydrin	66	Household Appliances and Pets	83
Treatment	66	Mistakes	83
Handling of Evidence	66	Conclusion	85
Applications	66	CHAPTER 4	
Oil Red O (ORO)	67	NOTE-TAKING	87
Treatment	67	Introduction	87
Handling of Evidence	67	Why Police Officers Should Take Notes	87
Applications	68	Notebook	87
Physical Developer	68	What to Write in a Notebook	88
Treatment	68	What not to Include in a Notebook	91
Handling of Evidence	68	Conclusion	91
Applications	69	CHAPTER 5	
Method	69	PHOTOGRAPHY	93
Retrieving Fingermarks from a Vehicle	70	Introduction	93
Immediate Surroundings of the Vehicle	70	Why Use Photography?	94
Tire Track Impressions and Footwear Prints	70	Fundamental Principles of Photography	94
Objects Outside	70	Lens	95
Vehicle	70	Diaphragm or Aperture	97
Processing the Scene of a Burglary or Break-and-Enter	72	Depth of Field	97
Parking Your Patrol Vehicle	72	Shutter	98
Meeting with the Complainant	73	Exposure Time	98
Searching for Fingermarks	73	Synchronization Speed	98
Detecting Fingermarks	73	Sensor and ISO	99
Absence of Fingermarks	73	Sensor	99
As the Investigation Progresses	75	Sensitivity of the Sensor	100
Fingermarks that were Matched to an Individual	75	Interaction Between the Various Camera Components	101
Conclusion	75	How Cameras Work	101
CHAPTER 3		Taking a Photograph	101
PROTECTING		Electronic Viewfinder (Non-Reflex Camera)	102
A CRIME SCENE	77	Optical Viewfinder (Reflex Camera)	103
Introduction	77	Automatic Focusing	104
Protective Perimeters	77	Active System	104
Inner Perimeter	78	Passive System	104
Outer Perimeter	79	Flash	104
Movement Techniques	80	Fixed Flash	104
Outdoor Scene	80	Removable Flash	105
Indoor Scene	80	Modes of Use	105
Securing the Crime Scene	81	Camera in Automatic Mode	106
Path of Contamination	82		

Types of Views	106	Electrostatic Lifting of an Invisible Footwear Impression Consisting of Dust	127
Use of the Ruler and other Reference Tools	108	Possible Ways to Process Bloody Footprints	131
Markers	109	Photography	131
Photography Traps to Bear in Mind	109	Impression with Low Contrast	131
Use of Photography in Police Work	114	Amido Black	131
Digital Photography	114	Magnetic Powder	131
Saving Images on a Memory Card	115	Luminol or Bluestar®	131
Recording Format	115	Preservation	132
RAW Format	115	Class Characteristics	132
JPEG Compression	116	Accidental Characteristics	133
Automatic Processing		Examination of a Footwear Print or Tire Track Impression by the Patrol Officer	133
Using the Camera Housing	116	Photography	134
Choosing Between RAW and JPEG Formats	117	Measurements	135
Camera Features	118	Footwear Prints	135
Inspecting the Camera	118	Tire Track Impressions	136
Before You Start Taking Photographs ...	118	Vehicle Dimensions	137
During the Job	119	Tracing	138
When the Job is Completed	119	General Principles	138
Archiving and Protecting the Integrity of Image Files	119	Required Equipment	138
Legal Provisions	120	Tracing Techniques	138
Eligibility	120	Impressions in the Ground	138
Image Enhancement	120	Impressions on Hard Surfaces	140
Taking and Storing Photographs	121	Impressions in Snow	140
Methods of Archiving	121	Impressions with Low or No Contrast	140
Conclusion	122	As the Investigation Progresses	143
 		Tracing as a Forensic Intelligence Tool	143
CHAPTER 6		Further Investigation and Arrest of a Suspect	143
FOOTWEAR PRINTS AND TIRE TRACK IMPRESSIONS	123	Legal Context	143
Introduction	123	Shoe Identification	143
Types of Impressions	124	Required Equipment	143
Molded Impressions	124	Procedure	144
Dust Impressions	124	Conclusion	147
Fat Impressions	125	 	
Dried Residue Impressions	125	CHAPTER 7	
Blood Impressions	125	TOPOGRAPHIC SURVEY	149
Searching for Impressions	125	Introduction	149
Ambient Light Reflection	125	Maps	149
Oblique Lighting	126	Sketches	150
Possible Ways to Process Various Types of Impressions	127	Proportional Sketch	150

Key Features of a Proportional Sketch	150	Who Can Pronounce the Death of a Victim?	179
Sketch on Scene	151	Observable Features on a Body	181
Relevant Elements	151	Lividity	182
General View of the Surroundings	151	Rigor Mortis	182
Interior Plan View	152	Blood Flow	183
Drawing a Rough Sketch	152	Possible Analyses	183
Finished Sketch	157	Causes of Death	183
Types of Views	157	Establishing Time of Death	183
Plan View	157	Description, Extent and Interpretation of Wounds Observed During Autopsy	184
Cross-Sectional View	158	Knife Wounds	184
Perspective View	158	Bullet Wounds	184
Elevation View	158	Bitemarks	184
What to Bear in Mind when Taking Measurements	159	Defensive Wounds	184
Taking Measurements at a Crime or Accident Scene	160	Using Appropriate Techniques to Sample Blood, Fluid or Biological Tissue	184
Fixed Point	160	Taking Samples of Fibers, Particles and Other Foreign Bodies for Biological or Ballistic Examination	185
Tangible	160	Exhumation	185
Semi-Tangible	161	Identification of an Unknown or Damaged Body	185
Non-Tangible	161	Fingerprints	185
Measuring by Triangulation	162	Dental Records	186
Advantage	164	DNA	186
Disadvantages of this Method at an Accident Scene	164	What Must Be Done at the Scene	186
Taking Measurements Inside a Room	164	Photographs	187
Taking Measurements with a Baseline	165	Drawing a Sketch	187
Advantage	167	Protection of Evidence	187
Disadvantage	168	Preparing the Body for Transport	188
Scale Drawing	168	Conclusion	188
Dividing the Drawing Sheet	170	 CHAPTER 9 FORENSIC BIOLOGY	189
Frame	170	Introduction	189
Border	170	Deoxyribonucleic Acid (DNA)	189
Drawing Location	170	Genes	190
Drawing	172	Comparing Samples	191
Proportional Sketch	172		
Scale Drawing	173		
Entering Relevant Information	174		
Ensuring the Drawing is Accurate	174		
Architectural Symbols	175		
Conclusion	177		
 CHAPTER 8 FORENSIC PATHOLOGY	179		
Introduction	179		
Signs of Obvious Death	179		

Legal Factors for Police Officers' Work Regarding DNA Profile Identification	191	Protective Measures against Biological Hazards	209
Convicted Offender File	192	Taking a Blood Sample from a Person	209
Crime Scene Index	192	Preparing the Finger	211
How to Take a Sample	193	Puncturing the Skin	211
Protective Measures against Biological and Bacteriological Hazards	196	Buccal Swabbing	212
Disposal of Contaminated Equipment	196	Taking a Hair Sample	214
Collecting Samples on a Crime Scene	197	Conclusion	214
Blood on a Crime Scene	197	 	
Sperm on a Crime Scene	197	CHAPTER 10	
Items or Substances That Can Be Examined for Saliva	197	FORENSIC CHEMISTRY	215
Handling	197	Introduction	215
Cigarette Butts	197	Parts or Substances that Can Be Examined	215
Bottle Necks	197	Paint and Coatings	215
Balaclava	197	Suggested method for paint removal and packaging	216
Envelope Flap or Postage Stamp	198	Adhesive Tape	217
Hair, Body Hair, Teguments	198	Suggested method for packaging tape	217
Other Recoverable Substances at the Crime Scene	198	Headlights and Light Bulbs	217
Rules to Follow to Avoid Contamination of Your Samples	199	Suggested method for the packaging of lights and bulbs	217
Cleaning Your Instruments	199	Small Electric Light Bulb (or Vehicle Headlight Bulb)	217
Photographs	199	Headlamps and Light Bulbs	218
Swabbing	200	Fibers	218
Dry Sampling of a Dried Substance	200	Possible Analyses	218
Moist Sampling of a Dried Substance	201	Suggested methods for fiber sampling	219
Sampling of a Wet Substance	202	Method 1	219
Suggested method for packaging blankets and sheets	202	Method 2	219
Suggested method for packaging clothes submitted for biological examination	205	Concrete, Mortar, Plaster	219
Suggested method for wrapping hair, body hair, paint residue and fibers	206	Suggested method for packaging concrete, mortar and plaster	219
Other Techniques Used on the Crime Scene	206	Glass	219
Bloodstain Pattern Analysis	206	Suggested method for packaging glass	219
Purpose	206	Arson	220
Two Methods	206	Possible Analyses	220
Results	207	Search on a Crime Scene	220
Luminol or Bluestar® (Forensic)	208	Suggested method for sampling	220
Purpose	208	Conclusion	221
Procedure	208	 	
Results	208	CHAPTER 11	
Samples Taken from a Person	209	BALLISTICS	223
		Introduction	223
		Terminology	223
		Revolver	223
		Pistol	224

Magazine	224	CHAPTER 12	
Machine Gun	224	FORENSIC TOXICOLOGY	239
Rifle	224	Introduction	239
Sawed-Off Shotgun	225	Items or Substances	
Rifling	225	that Can Be Examined	239
Shotgun	225	Blood Samples	239
Cartridge	225	Drugs	240
Projectile	225	Hazardous Material (Syringe, Pipe, etc.)	240
Cartridge Casing	225	Medicines	240
Shotgun Shell	225	Residues (in Glass, Cup, Bottle)	240
Primer	226	Conclusion	241
Striations and Pitch	226	CHAPTER 13	
Contact Shot	226	DOCUMENT ANALYSIS	243
Point-Blank Shot		Introduction	243
(Close to Very Close Range)	227	Possible Methods of Analysis	243
Possible Examinations and Analyses		Writing	243
of Firearms and their Components	227	Comparing a Writing Sample	
Firearms	227	Obtained from a Suspect	
Cartridges	229	with a Handwritten Document	243
Cartridge Casings	229	Indentation	244
Projectiles	230	Revealing Non-Visible Writing	
Suggested method for packaging		Embedded in a Sheet of Paper	244
a firearm and its components	230	Paper	245
Gunshot Residues	232	Counterfeit	245
IBIS System	233	Reconstitution of Torn	
Clothing	237	or Damaged Documents	245
Suggested method for packaging clothing		Pens and Ink	245
submitted for ballistics expertise	237	Suggested general method for packaging	
Firing Angle	237	and protecting documents	246
Other Possible Examinations		Conclusion	246
and Analyses	237	CHAPTER 14	
Knives	237	COURT TESTIMONY	247
Club Weapons		Introduction	247
(Brass Knuckles, Nunchaku)	237	Work Done when Responding	
Projectile Weapons (Slingshots,		to the Incident	247
Crossbows, Blowguns)	237	Methodical Work	247
Electrical Weapons		Note-Taking	247
(e.g.: Taser [®] Electric Gun)	237	Working in Collaboration	
Suggested packaging method	238	with the Prosecutor	248
Tools and Tool Marks	238	Reading the Case File	248
Suggested method for packaging		Communication with the Prosecutor	248
a tool or knife	238	Planning Meeting	248
Conclusion	238	Day Before the Hearing	249
		Do Final Checks	249

Day of the Hearing	249	Filing Exhibits with the Court	255
Testimony	250	Suggested method for the filing of exhibits ..	255
Ethical Rules	250	Preparation Before Testimony	255
Preparation of the Courtroom	250	In Court	256
Behaviour	250	Questions You May Be Asked	256
Inside the Courtroom	250	Suggested method for filing photographs	257
Outside the Courtroom	251	Preparation Before Testimony	257
Non-Verbal Language	251	In Court	257
Verbal Communication	252	Questions	257
How to Control Your Stress	252	Description of Photographs	258
Control Your Breathing	252	Suggested method for submitting	
Work on Scene	252	a sketch or scale drawing	258
Preparing the Case File	252	Preparation Before Testimony	258
Delivering Your Testimony	253	In Court	258
Delivering Your Testimony		Questions	258
Before a Jury	253	Suggested method for filing	
Use of Personal Notes	253	a fingerprint lifter	259
Answering the Prosecutor's Questions	253	Preparation Before Testimony	259
Content	254	In Court	259
Being Cross-Examined by the Defence	254	Questions	259
Techniques Used by Defence Lawyers		Conclusion	259
in Cross-Examination	254	BIOGRAPHIES	261
Omission	255		
Error	255		
At the End of Your Testimony	255
